Dr. Williams' Pink Pills Strengthen the Stomach and Enable It to Do Its Work.

When the stomach is feeble the food lies in it undigested, decays and throws off poisonous gases that distend the walls of the stomach and cause inter-ference with other organs, especially with the action of the heart and lungs. These gases have other ill effects. The nerves and the brain are disturbed and discomforts such as dizziness, hot flashes, sleeplessness, irritableness and despondency originate from this source.

Experience shows that these troubles vanish just as soon as the stomach is made strong enough to digest the food. In other words, it needs a tonic that will rouse it to do the work of changing the

food into nourishment. Miss Minerva C. Ladd, of Ipswich, I hastily opened the envelope with a Mass, says: "I had a weak stomach from the time I was a little child. Whenever I took hearty food it would cause terrible faintness, and I would finally vomit what I had eaten. At times there would be the most intense pains through the upper part of my body. For days in succession, I would have to lie down most of the time. The distress was often so great that I could hardly bear it, and the frequent and violent belching spells were very

disagreeable, too. "My doctor's medicines gave me little relief and it was not until I tried Dr. Williams' Pink Pills that I found a cure. Within three weeks a decided improvement was noticeable. The belching spells were less frequent, the pains through my body were not so intense, my food was retained and after taking the pills for a few weeks longer I found that I was altogether free from the miseries I had so long suffered." Every dyspeptic should read "What to Eat and How to Eat." Write the Dr.
